5a Ex DL

REGISTER OF RAINFALL IN 1910

FORM A2. BRITISH RAINFALL.

4 JAN 1911

Kept at "Longfield", Grant Rd, Knotty Ash

in the County of Lancashire 1

by W. M. Reade

RAIN GAUGE
Pattern Old Rattenby L. Castle
Diameter of top 5 in.
Height of top above Ground 10 ft. in.
" " " Sea Level 100 ft.

Time of Observation 9 a m

Nearest Railway Station
Name Broad Green
Distance 2m Direction S.W

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.
-3 JAN 1910

Kept at Lancaster

in the County of Lancaster

by A. B. A. Welch

Rain Gauge
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. 0
" " " Sea Level 85 ft.

Time of Observation 9.0 a.m.

Nearest Railway Station
Name Lancaster
Distance 1m Direction N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2. BRITISH RAINFALL.

25 MAY 1911

Kept at Scotforth Lancaster

in the County of Lancaster 4

by A. B. S. Welch

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. – in.
" " " Sea Level 85 ft.

Time of Observation 9. a.m.

Nearest Railway Station
Name Lancaster
Distance 1m. Direction N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Dear Sir

I enclose my Register of Rainfall for 1908. I regret in making the copy that I entered March in February column, before I discovered the error. I have altered the months at head of columns & left the entry.

Yrs truly

REGISTER OF RAINFALL IN 1909.

FORM A2.
BRITISH RAINFALL.

7 JAN 1910

Kept at Sackville St, Depôt
in the ~~County~~ City of Manchester
by ~~Manchester Corporation~~ E. Walker.
~~Rivers Committee.~~

RAIN GAUGE
Pattern Negretti & Zambra No 33 (automatic)
Diameter of top Eight in.
Height of top above Ground 3 ft. 2 in.
" " " Sea Level 118·49 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name London Road, L.N.W.
Distance 500 yards Direction N.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

Jan. 1, following.

Note! [illegible] c Apr '10

7th January, 1911.

Dr. Hugh R. Mill, F.R.Met.S.,
British Rainfall Organisation,
London.

Dear Sir,

I have pleasure in submitting herewith threerrecords of rainfall kept by the Rivers Department at various points in and about this City. You will note the low figure given by the Sackville-street Depot gauge. This is VERY UNRELIABLE, as the gauge has been repeatedly out of order, and is not worth repairing. A proposal is at present on foot to replace it by a new gauge in a better position in the northern part of the City. Therefore, kindly do not include these figures in your lists this year. You may, however, use the record in any other way you desire. We have installed another gauge at our Gorton Sewage Works, and this has been working since the 1st April, and records will be sent in regularly in future.

Yours faithfully,

G. F. Walter

Secretary.

Ex 95

REGISTER OF RAINFALL IN 1910.

FORM A2.
BRITISH RAINFALL.

9 JAN 1911

Kept at Sackville St Depôt

in the ~~County~~ City of Manchester.

by Manchester Corporation Rivers Committee.

RAIN GAUGE
Pattern Negretti & Zambra (automatic)
Diameter of top Eight in.
Height of top above Ground 3 ft. 2 in.
" " " Sea Level 118·49 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name London Road (LNW)
Distance 500 yards Direction N.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.

4 JAN

Kept at Manchester (299 Oldham Rd

in the County of Lancaster

by J. H. Burgess for Dr. Niven

Rain Gauge
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. — in.
" " " Sea Level 191·25 ft.

Time of Observation 9 a m

Nearest Railway Station
Name Miles Platting
Distance 900 yds Direction NE

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.

7 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at 299 Oldham Rd., Manchester

in the County of Lancaster 3

by J. H. Burgess

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. – in.
" " " Sea Level 191·25 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.

31 JAN 1911

Kept at MANCHESTER WHITWORTH PARK

in the County of Lancashire 3

by W. C. Lantsberry

RAIN GAUGE
Pattern
Diameter of top 8 in.
Height of top above Ground 1 ft. in.
" " " Sea Level 124·7 ft.

Time of Observation 9 a. m.

Nearest Railway Station
Name Oxford Road. M/c.
Distance 1 ml Direction North

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909.

FORM A2.
BRITISH RAINFALL.
23 JUN 1910
3034

Kept at Morecambe
in the County of Lancashire
by F. B. Lamb Sanitary Inspector

RAIN GAUGE
Pattern
Diameter of top 8 in.
Height of top above Ground 1 ft. — in.
" " " Sea Level 23·61 ft.

Time of Observation 9.0 a.m.

Nearest Railway Station
Name Midland
Distance 200 yds Direction West.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910.

FORM A2.
BRITISH RAINFALL.
22 FEB 1911
3034

Kept at Morecambe.
in the County of Lancashire 3
by J. B. Lamb. Sanitary Inspector.

RAIN GAUGE
Pattern
Diameter of top 8" in.
Height of top above Ground 1 ft. 0 in.
" " " Sea Level 23·61 ft.

Time of Observation 9·0 a.m.

Nearest Railway Station
Name Midland
Distance 100 y^ds Direction W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM 2
BRITISH RAINFALL
31 JAN 1911

~~2~~2807

RE

53 ORMSKIRK

Kept at Bickerstaffe P. ~~Station~~ Pumping

in the County of S. Lancashire 1

by S. R. Rafferty Esq

RAIN GAUGE Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. 2 in.
" " " Sea Level 128 ft.

Time of Observation

Nearest Railway Station Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REC

FORM A2.
BRITISH RAINFALL.
13 JAN 1911

Kept at Upholland (Grammar School)

in the County of Lancashire (near Wigan)

by C. H. Cox, B. Sc. (headmaster)

RAIN GAUGE: Diameter of top 5 in.
Height of top above Ground 1 ft. 0 in.
" " " Sea Level 300 ft.

Time of Observation 9 A.M.

Nearest Railway Station: Name Orrell (L + Y)
Distance ½ m. Direction East

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAIN~~FALL~~ IN 1909.

FORM A2. BRITISH RAINFALL.

23 APR 1910

Kept at Corporation Offices Preston Tithebarn Street

in the County of Lancaster

by Thomas Cookson

RAIN GAUGE
Pattern
Diameter of top 8 in.
Height of top above Ground 18 ft. 7 in.
" " " Sea Level 148. ft.

Time of Observation 9 O'clock A.M.

Nearest Railway Station
Name Preston
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A. BRITISH RAINFALL

-6 JAN 1910

REGISTER OF RAINFALL IN 1909

Kept at Fieldhead Yard, Rochdale.

in the County of Lancashire

by Mr. S. S. Platt M. Inst. C.E. Borough Surveyor

Rain Gauge:
Pattern Ordinary Rain Gauge.
Diameter of top 8 in. x 11¾" deep.
Height of top above Ground 12 ft. 0 in.
" " " Sea Level 483·90 ft.

Time of Observation 9·0 a.m.

Nearest Railway Station:
Name Wardleworth.
Distance 380 yards Direction South East.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.

4 FEB 1910

Kept at Broadfield Park Observatory, Rochdale

in the County of Lancaster

by Medical Officer of Health, A. G. Anderson Esq, M.D., D.P.H., D.Sc, &c.

RAIN GAUGE
Pattern Snowdon
Diameter of top 8 in.
Height of top above Ground — ft. 6 in.
" " " Sea Level 442 ft.

Time of Observation 9.0 a.m.

Nearest Railway Station
Name Rochdale
Distance about 600 yds. Direction S.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2. BRITISH RAINFALL.

2 FEB 1911

Kept at Broadfield Park Observatory Rochdale
in the County of Lancaster 3
by the Medical Officer of Health (A. G. Anderson Esq. M.D., M.A., B.Sc., D.P.H.)

Rain Gauge
Pattern "Snowdon"
Diameter of top 8 in.
Height of top above Ground ft. 6 in.
" " " Sea Level 472 ft.

Time of Observation 9. 0 am

Nearest Railway Station
Name Rochdale
Distance about 600 yds Direction S. E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

by The Heywood & Middleton Water Board

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. 7½ in.
" " " Sea Level 760·74 ft.

Time of Observation

Nearest Railway Station
Name Wardleworth
Distance 3½ mi Direction S.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.

25 MAY 1911

Kept at Rufford

in the County of Lancaster. 2

by Harold Haskell.

RAIN GAUGE
Pattern Snowden
Diameter of top 5 in.
Height of top above Ground 1 ft. 0 in.
" " " Sea Level 41 ft. approx.

Time of Observation 9 a.m.

Nearest Railway Station
Name Rufford
Distance 666 Direction S.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

Kept at Heaton Mersey

in the County of Lancaster 4

by W. B. Leigh 2847? 2807

RAIN GAUGE: Pattern
Diameter of top 5 in.
Height of top above Ground 3 ft. 11 in.
" " " Sea Level 218 ft.

The particulars exactly as before

Time of Observation

Nearest Railway Station: Name / Distance / Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910.

23 FEB 1911

FORM A2.
BRITISH RAINFALL.

Kept at Hesketh Park, Southport

in the County of Lancaster. 3

by Joseph Baxendell, for the Corporation of Southport.

RAIN GAUGE
Pattern Halliwell's self-recording
Diameter of top 11 in.
Height of top above Ground 1 ft. 5 in.
„ „ „ Sea Level 39 ft.

Time of Observation 12 Midnight.

Nearest Railway Station
Name Hesketh Park.
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

STONYHURST OBSERVATORY, LANCASHIRE.

REGISTER OF RAINFALL IN 1909.

FORM A2. BRITISH RAINFALL.

JAN 1910

Kept at Stonyhurst College Observatory

in the County of Lancaster

by The Revd Walter Sidgreaves S.J.

RAIN GAUGE Pattern Beckley Self Recorder

Diameter of top 11 in.

Height of top above Ground 1 ft. 10 in.

" " " Sea Level 376 ft. 10 inches

Time of Observation 10 am.

Nearest Railway Station Name Whalley L&Y.

Miles Distance 4½ Direction S.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.

12 JAN 1911

Kept at Stonyhurst College Observatory

in the County of Lancaster.

by Rev. Walter Sidgreaves S.J. F.R.A.S.

RAIN GAUGE
Pattern M.O.
Diameter of top 11 in.
Height of top above Ground 1 ft. 10 in.
" " " Sea Level 377 ft.

Time of Observation 10. am

Nearest Railway Station
Name Whalley L&Y.
Distance 5 miles Direction N.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

23rd January, 1911.

Messrs. The British Rainfall Organization,
62, Camden Square,
London, N.W.

Dear Sirs,

Referring to your favour of the 19th inst., I enclose herewith your form A.2., duly filled up for the year.

I have made a practice in the past of recording the rainfall up to 9 a.m. on any day as against that day. I have, however, in the enclosed form rectified this and give you the figures as you require them. This will account for the variation between the figures which you already have and those now enclosed.

I note that on page 13 of your leaflet "Rules for Rainfall Observers" you state that dew or mist is to be recorded.

About two years ago there were two days of exceptionally heavy dew and not knowing whether to record this or not, I enquired of the Manchester University Society and was informed by them that dew should never be recorded provided it was certain that it was not rainfall.

I only mention this as it seems a pity that the same rules should not be applied all over the country and one would naturally look to a society of this kind for correct infomation considering they supply a large part of the Manchester people with daily information through the "Manchester Guardian."

I remain, Dear Sirs,

Yours faithfully,

G.W. Tesson

over

Would a weekly Barograph record with rainfall put against each day be of any interest to you?

G.C.W.

So

FORM A2.
BRITISH RAINFALL
3 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at Urswick Schoolhouse, Ulverston

in the County of Lancashire

by John Dobson.

Rain Gauge
Pattern Howard's
Diameter of top 5 in.
Height of top above Ground 1 ft. 3 in.
" " " Sea Level 140 ft.

Time of Observation 8 am

Nearest Railway Station
Name Lindal (Furness Ry)
Distance NNW Direction 2 miles

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.
8 am Dec 31 to 8 am Jany 1

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

24 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at Cowm Brook Reservoir

in the County of Lancaster 3

by the Rochdale Corporation

RAIN GAUGE
Pattern
Diameter of top 8 in.
Height of top above Ground 1 ft. 7 in.
" " " Sea Level 760 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Whitworth (L & Y Ry)
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

FORM A2.
BRITISH RAINFALL.

11 JAN 1910

REGISTER OF RAINFALL IN 1909.

Kept at ~~The Ha~~ Wigan (The Mansion house)

in the County of Lancashire

by H. Nowell Ffarington

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. 0
" " " Sea Level 150 ft.

Time of Observation 9 am

Nearest Railway Station
Name Wigan (L&NW)
Distance 1¼ mile Direction N.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

BRITISH RAINFALL.

20 JAN 1910

REGISTER OF RAINFALL IN 1909

Kept at Chorlton cum Hardy
in the County of Lancashire
by Jos. H. Casartelli

Rain Gauge:
Pattern Symons.
Diameter of top 5 in.
Height of top above Ground 2 ft. – in.
" " " Sea Level 75 ft.

Time of Observation 9 am.

Nearest Railway Station: Name Chorlton cum Hardy
Distance ½ mile Direction E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
25 JAN 1911

Kept at Chorlton cum Hardy.

in the County of Lancashire. 4

by Jos. H. Casartelli.

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 2 ft. 0 in.
" " " Sea Level 75 ft.

Time of Observation 9 am.

Nearest Railway Station
Name Chorlton c Hardy.
Distance ½ m. Direction N.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

4 JAN 1911

In making up my return last night, I did not make it clear that the return for the last day of each month was made up to 9 am, as on Sundays but all other observations were made at 7 am.

I regret that I did not make this clear on my return.

Herbert Hooke

REGISTER OF RAINFALL IN 1910.

FORM A2.
BRITISH RAINFALL.
3 JAN 1911

Kept at Wray Vicarage

in the County of Lancaster. 4

by Rev. C. L. Reynolds.

RAIN GAUGE
Pattern Snowden
Diameter of top 5 in.
Height of top above Ground 1 ft. 3 in.
" " " Sea Level 165 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Hornby.
Distance 1 mile Direction W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.
